# 1

## State Economic Development

Ensuring a pipeline of discoveries and projects to support a sustainable and profitable resources industry, contributing to the SA economy

# 2

## Energy

Energy reform requires a balanced approach to provide a secure, reliable and affordable energy for all, with greater access to oil and gas

# 3

## Infrastructure

Addressing bottlenecks to 'open up' the north and west of the State to boost productivity throughout the South Australian economy

# 4

## Legislation & Regulation

Influence the development of efficient, effective and transparent regulation of the resources industry to promote investment

# State Economic Development

Call for all political stakeholders to:

---

SACOME

1. Reject the use of moratoria.
  2. Increase access to the WPA to support increased exploration and improve access arrangements.
  3. Increase PACE Minerals funding.
-

# Infrastructure

Call for all political stakeholders to:

---

4. Commit to pursue Commonwealth co-funding for duplication of the Joy Baluch Bridge.
  5. Enable the prompt development of port infrastructure projects.
  6. Invest in electricity transmission infrastructure in the Far North and on the Eyre Peninsula.
-

# Energy

Call for all political stakeholders to:

---

7. Work together to develop nationally cohesive energy policy.
  8. Support continued investment in electricity storage options that will improve the reliability and operation of variable renewable energy generation and supply of electricity.
  9. Support the development of conventional and unconventional gas projects.
-

# Legislation & Regulation

Call for all political stakeholders to:

---

10. Commit to completion of the Leading Practice Mining Acts Review process following the 2018 State Election.
  11. Enable land access opportunities for the resources sector.
  12. Complete EPBC Bilateral agreements between the South Australian and Commonwealth Governments.
-
